Moltti-Taper System

B&R Moll Inc. has designed a state of the art independent taping system that can be automatically fed. The Moltti-Taper System has an economical foot print that enables the system to be installed in trade finishers, offset, and digital print environments. The machine has a built in registration system to ensure that each piece is taped with accuracy. The set up time between jobs is minutes. It can be configured to tape a range of finished pieces, including table talkers, wobblers, shelf talkers, posters, signage, pocket folders, envelopes, CD sleeves, and much more.

Features and Capabilities

- Independent continuous feeder
- Feeder can feed regular and irregular shaped objects
- Built in registration
- Tape machine section can run in line with an existing feeder
- Equipped with four channel controller, eye, and LMS
- Heavy duty reinforced frames
- Can run double sided tape or tear tape
- Feeder can be removed for hand feeding objects
- Changeover is minutes
- One heavy duty Tape Head (Standard)
- Tape Head is equipped with a flip mount that allows you to place a new roll of tape on without losing position
- Capable of running up to 4 tape heads
- 100V
- Economical foot print
- Ideal for taping table talkers, wobblers, shelf talkers, posters, signage, full sheets, and much more

Molli-Taper System

Feeder and Taping Table can run separate.

Molli-Taper System Machine Specifications
